This survey investigates and evaluates the legal framework which an engineer faces when stepping into an ARGE partnership with other planning offices. ARGE, in the German construction industry an established form of partnership, becomes more and more important in acquiring and accomplishing construction projects. The ARGE underlies the regulations of the German Partnership under Civil Law; consequently, the ARGE partners are jointly and individually liable for the contract. Thus the principal of the overall project enjoys fundamental advantages: He reduces his risk should it come to an insolvency of an ARGE partner, he increases competition, and he gets services out of one hand. Engineering firms who want to participate in these projects have to handle their capacities and risks. Presently, many engineering firms are not interested in participating in ARGE partnerships as they see no reason for a voluntary sharing of liability and want to be responsible and liable only for services they performed. Therefore, engineering firms are interested in an ARGE agreement which divides the responsibilities and liabilities in consideration of the rendered services. In external discussions with principals, ARGE partner could not change the joint and individual liability. Principals will not deal with the limitation of ARGE partners' liabilities. However, other regulations could be defined in internal arrangements. Besides the law-related aspects, it is advisable to redefine other regulations in the ARGE agreement. Partners, for example, should define a fulfillment obligation. In case of insolvency of one partner, the other partners still have to fulfill the contract. If there are services which they cannot carry out by themselves, they have to involve other partners.

According to the United States Small Business Administration's most recently released date, there are more than 9 million small businesses in the United States and almost 250,000 new ones started every year. Of those new businesses, half will fail in the first 12 months and part of that failure is due to the lack of information about how to start and develop that business. Without the right legal form of business, you may end up paying too much in taxes, failing to comply with certain laws, or miss out on certain breaks that you deserve. This book provides you with a complete guide, discussing all four major forms of business, which one is right for you, and how your decision may affect you in the future. The first thing you will read about is the list of non-legal issues you need to deal with before you start the business creation process. In addition, you will learn which form of business is ideal for your particular situation with a short overview of each type, a comparison of what each offers, and how the legal implications of each might apply to you. You will learn specifically how to choose between an LLC and a corporation in instances where it might not be immediately clear which is best for you. You will also learn which special business structures are best suited to your needs if you do not fit into any of the four primary categories. The process of structuring a partnership is outlined, along with how to create a written agreement and how to change a partnership after the business has been created. You will also learn how to create a corporation, including the structure you will use, how to establish financing, the compensation you will provide yourself, whether you need a lawyer, the 13 step process of starting and filing your corporation, and what you need to do immediately afterwards. The number of members needed to create an LLC is provided as well, along with how to structure management and determine financing and compensation. Hours of careful interviews were conducted with successful small business owners and legal experts to help create a comprehensive collection of materials that will guide you through the processes above, as well as how to handle transition of ownership and the extended process of naming your business "including the legal implications of this process, what you need to know about trademarks and service marks, how to protect your own trademarks, and where to do name searches. The licensing and permit processes, as well as the tax structures for each business type, are included for federal, state, and local laws, while additional information is provided on how to build your home-based business as opposed to one in a physical location. If you are looking to create a new business and do not know which

format is best for your needs, this book will walk you through each step of the selection process, making sure your new business meets all applicable laws and regulations.
