Why attractive things work better and other crucial insights into human-centered design Emotions are inseparable from how we humans think, choose, and act. In Emotional Design, cognitive scientist Don Norman shows how the principles of human psychology apply to the invention and design of new technologies and products. In The Design of Everyday Things, Norman made the definitive case for human-centered design, showing that good design demanded that the user's must take precedence over a designer's aesthetic if anything, from light switches to airplanes, was going to work as the user needed. In this book, he takes his thinking several steps farther, showing that successful design must incorporate not just what users need, but must address our minds by attending to our visceral reactions, to our behavioral choices, and to the stories we want the things in our lives to tell others about ourselves. Good human-centered design isn't just about making effective tools that are straightforward to use; it's about making affective tools that mesh well with our emotions and help us express our identities and support our social lives. From roller coasters to robots, sports cars to smart phones, attractive things work better. Whether designer or consumer, user or inventor, this book is the definitive guide to making Norman's insights work for you.

NEW YORK TIMES BESTSELLER • REESE'S BOOK CLUB PICK • From a leading voice on racial justice, an eye-opening account of growing up Black, Christian, and female that exposes how white America's love affair with "diversity" so often falls short of its ideals. "Austin Channing Brown introduces herself as a master memoirist. This book will break open hearts and minds."—Glennon Doyle, #1 New York Times bestselling author of *Untamed* Austin Channing Brown's first encounter with a racialized America came at age seven, when she discovered her parents named her Austin to deceive future employers into thinking she was a white man. Growing up in majority-white schools and churches, Austin writes, "I had to learn what it means to love blackness," a journey that led to a lifetime spent navigating America's racial divide as a writer, speaker, and expert helping organizations practice genuine inclusion. In a time when nearly every institution (schools, churches, universities, businesses) claims to value diversity in its mission statement, Austin writes in breathtaking detail about her journey to self-worth and the pitfalls that kill our attempts at racial justice. Her stories bear witness to the complexity of America's social fabric—from Black Cleveland neighborhoods to private schools in the middle-class suburbs, from prison walls to the boardrooms at majority-white organizations. For readers who have engaged with America's legacy on race through the writing of Ta-Nehisi Coates and Michael Eric Dyson, *I'm Still Here* is an illuminating look at how white, middle-class, Evangelicalism has participated in an era of rising racial hostility, inviting the reader to confront apathy, recognize God's ongoing work in the world, and discover how blackness—if we let it—can save us all.

Using sixty years of global research from Gallup as well as many consumer stories, the author shows why most advertising fails and identifies the qualities that make an ad connect with consumers. 50,000 first printing.

'I believe that 'emotion' is where it's at' Tom Peters For far too long, emotions have been ignored in favour of rationality and efficiency, but breakthroughs in brain science have revealed that people are primarily emotional decision-makers. Many companies have not yet accepted that fact, much less acted on it. In this fully revised edition, Emotionomics will help you to understand emotions in terms of business opportunities - both in the marketplace and in the workplace. In today's highly competitive marketplace where many products look alike, it is the emotional benefit that can make the difference. At the same time, companies with engaged, productive work forces will undoubtedly achieve competitive advantage. Dan Hill's book draws on insights gathered through facial coding, the single best viable means of measuring and managing the emotional response of customers and employees, to help you to leverage emotions for business success in terms of branding, product design, advertising, sales, customer satisfaction, leadership and employee management. Emotions matter and Emotionomics will help you to step closer to customers and employees, but step ahead of your competitors.

Emotional Branding is the best selling revolutionary business book that has created a movement in branding circles by shifting the focus from products to people. The "10 Commandments of Emotional Branding" have become a new benchmark for marketing and creative professionals, emotional branding has become a coined term by many top industry experts to express the new dynamic that exists now between brands and people. The emergence of social media, consumer empowerment and interaction were all clearly predicted in this book 10 years ago around the new concept of a consumer democracy. In this updated edition, Marc Gobé covers how social media helped elect Barack Obama to the White House, how the idea behind Twitter is transforming our civilization, and why new generations are re-inventing business, commerce, and management as we know it by leveraging the power of the web. In studying the role of women as "shoppers in chief," and defining the need to look at the marketplace by recognizing differences in origins, cultures, and choices, Emotional Branding foresaw the break up of mass media to more targeted and culturally sensitive modes of communications. As the first marketing book ever to study the role of the LGBTQ community as powerful influencers for many brands, Emotional Branding opened the door to a renewed sensitivity toward traditional research that privilege individuality and the power of the margins to be at the center of any marketing strategy. A whole segment in the book looks at the role of the senses in branding and design. The opportunity that exists in understanding how we feel about a brand determines how much we want to buy. By exploring the 5 senses, Emotional Branding shows how some brands have built up their businesses by engaging in a sensory interaction with their consumers. Emotional Branding explores

how effective consumer interaction needs to be about senses and feelings, emotions and sentiments. Not unlike the Greek culture that used philosophy, poetry, music, and the art of discussion and debate to stimulate the imagination, the concept of emotional branding establishes the forum in which people can convene and push the limits of their creativity. Through poetry the Greeks invented mathematics, the basis of science, sculpture, and drama. Unless we focus on humanizing the branding process we will lose the powerful emotional connection people have with brands. Critics hailed Emotional Branding as a breakthrough and a fresh approach to building brands. Design in this book is considered a new media, the web a place where people will share information and communicate, architecture a part of the brand building process, and people as the most powerful element of any branding strategy. Most importantly, it emphasizes the need to transcend the traditional language of marketing--from one based on statistics and data to a visually compelling new form of communication that fosters creativity and innovation. This book uses interviews and case studies to show how belief-led brands such as Google, Zara and Camper have outstripped the growth of their peers by igniting passion among employees and consumers alike. These passion brands show the way to marketing in the 21st century. Drawing on both research and academic theory, the authors provide a practical, systematic approach to the business of transforming brands into passion brands. "Creating Passion Brands" shows what really counts at the heart of branding today.

The purpose of this review is to provide an overview of various literatures related to consumer search for information, and its effect on markets. Normative models of consumer search prior to purchase, and of consumer search through experience, are reviewed first. Models of consumer consideration set formation are also outlined. These models are generally based on consumers balancing the costs and benefits of search, which implies that search should be limited if it is costly. The extensive empirical literature on consumer search, which is reviewed next, does indicate that search is limited. The third major section of this review discusses the effect of search on market equilibrium, and market forces related to the supply of information. These include models of how advertising, retailing, and the Internet become organized to facilitate consumer search. The review concludes with a discussion of overall findings and suggestions for further research.

Brandjam, the follow-up to the groundbreaking best-seller Emotional Branding, presents a powerful new concept from renowned designer and business guru Mark Gobe. The Brandjam concept is about innovation, intuition, and risk. Using jazz as his metaphor, he shows how the instinctive nature of the creative process leads to unusual solutions that make people gravitate toward a brand and make brands resonate with people by bringing more joy into their lives. The definitive book on sensory branding, shows how companies appeal to consumers' five senses to sell products. Did you know that the gratifying smell that accompanies the purchase of a new automobile actually comes from a factory-installed aerosol can containing “new car” aroma? Or that Kellogg's trademarked “crunch” is generated in sound laboratories? Or that the distinctive click of a just-opened jar of Nescafé freeze-dried coffee, as well as the aroma of the

crystals, has been developed in factories over the past decades? Or that many adolescents recognize a pair of Abercrombie & Fitch jeans not by their look or cut but by their fragrance? In perhaps the most creative and authoritative book on how our senses affect our everyday purchasing decisions, global branding guru Martin Lindstrom reveals how the world's most successful companies and products integrate touch, taste, smell, sight, and sound with startling and sometimes even shocking results. In conjunction with renowned research institution Millward Brown, Lindstrom's innovative worldwide study unveils how all of us are slaves to our senses—and how, after reading this book, we'll never be able to see, hear, or touch anything from our running shoes to our own car doors the same way again. An expert on consumer shopping behavior, Lindstrom has helped transform the face of global marketing with more than twenty years of hands-on experience. Firmly grounded in science, and disclosing the secrets of all our favorite brands, *Brand Sense* shows how we consumers are unwittingly seduced by touch, smell, sound, and more.

This book explores the psychological factors underlying brand choices we make. How we encounter brands (and how often we), think about them, feel about them, and how we experience them in relation to competing brands, has a big effect on which ones we choose, and keep on choosing. At the same time, presumably there are neural events occurring when we encounter and mentally respond to brands. These represent ways in which we can explain and understand why people choose and remain loyal to brands. These explanations of branding are related and intuitive. But how does the psychology of branding work? This book offers answers to that question. Brands are all around us and in a sense represent any person, place, or thing to which people attach associations - anything that represents something for

someone. This insight has led those trying to improve society, not just to sell products, services, and organizational reputations, but to take up the mantle of branding. The branding of social and health behaviors has become widespread and is now a central approach in social marketing - the use of marketing to benefit society rather than the marketer. In an earlier volume, my co-editor Gerard Hastings and I noted "that by learning about concepts such as brand development, identity and equity, we can do for public health what Philip Morris had done for teen smoking." This is exactly what's been happening for some 20 years, and now branding represents a powerful strategy to change social and health behaviors for the better. Branding is now truly a systemic approach to modifying human behavior for commercial as well as socially beneficial purposes.

In today's competitive and global marketplace, it is becoming increasingly essential for companies and brands to understand why customers buy—or don't buy—their products and services. Only by understanding the "whys" can companies grow their business and develop loyal customers. In *Empathetic Marketing*, Dr. Mark Ingwer presents a groundbreaking approach to understanding consumers' core emotional needs. This innovative book provides both the psychological theory underlying consumers' emotional needs, as well as concrete business examples that demonstrate the incredible effectiveness of unleashing the power of deeper needs and emotions for success in the marketplace. *Empathetic Marketing* shows how brands like NPR, Universal Studios, Nivea, and Google perform in-depth analyses of their customers' emotional reactions and harness the power of deep psychological insights to optimize their marketing and brand strategy. As the founding partner at Insight Consulting Group, a global marketing and strategy consultancy, Mark Ingwer has conducted and analyzed countless in-depth studies of customers, from neurological data to in-field observational studies. Through his extensive experience he has identified six basic emotional needs that every company must consider to fully impact and motivate the customer. *Empathetic Marketing* provides readers with a deeper understanding of customers' core emotional needs, and a framework for incorporating these concepts into their business to optimize customer engagement and achieve a significant return on this investment. The strategies provided will not only lead to a better immediate connection between the customer and the company, but also to deeper and longer-term satisfaction for both customers and business leaders.

For too long marketers have been asking the wrong question. If consumers make decisions unconsciously, why do we persist in asking them directly through traditional marketing research why they do what they do? They simply can't tell us because they don't really know. Before marketers develop strategies, they need to recognize that consumers have strategies too . . . human strategies, not consumer strategies. We need to go beyond asking why, and begin to ask how, behavior change occurs. Here, author Douglas Van Praet takes the most brilliant and revolutionary concepts from cognitive science and applies them to how we market, advertise, and consume in the modern digital age. Van Praet simplifies the most complex object in the known universe - the human brain - into seven codified actionable steps to behavior change.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. *START WITH WHY* asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all

START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.
