Over the past twenty years more citizens in China and India have raised themselves out of poverty than anywhere else at any time in history. They accomplished this through the local business sector the leading source of prosperity for all rich countries. In most of Africa and other poor regions the business sector is weak, but foreign aid continues to fund government and NGOs. Switching aid to the local business sector in order to cultivate a middle class is the oldest, surest, and only way to eliminate poverty in poor countries. A bold fusion of ethics and smart business, *The Aid Trap* shows how the same energy, goodwill, and money that we devote to charity can help local business thrive. R. Glenn Hubbard and William Duggan, two leading scholars in business and finance, demonstrate that by diverting a major share of charitable aid into the local business sector of poor countries, citizens can take the lead in the growth of their own economies. Although the aid system supports noble goals, a local well-digging company cannot compete with a foreign charity that digs wells for free. By investing in that local company a sustainable system of development can take root.

All students can relate to businesses they encounter in their everyday lives. Whether they open an art studio, do social work, trade on Wall Street, work for the government, or bartend at the local pub, students will benefit from understanding the economic forces behind their work.

The ultimate sartorial and etiquette guide, from the ultimate life and style guru. By turns witty, sardonic, and always insightful, Glenn O'Brien's advice column has been a must-read for several generations of men (and their spouses and girlfriends). Having cut his teeth as a contributor at Andy Warhol's Interview in its heyday, O'Brien sharpened them as the creative director of advertising at the hip department store Barneys New York for ten years before starting his advice column at Details magazine in 1996. Eventually his column, "The Style Guy," migrated to its permanent home at GQ magazine, where O'Brien dispenses well-honed knowledge on matters ranging from how to throw a cocktail party (a diverse guest list is a must), putting together a wardrobe for a trip to Bermuda (pack more clothes for less dressing), or when it is appropriate to wear flip-flops in public (never). How To Be a Man is the culmination of O'Brien's thirty years of accumulated style and etiquette wisdom, distilled through his gimlet eye and droll prose. With over forty chapters on style and fashion (and the difference), on dandies and dudes, grooming and decorating, on how to dress age-appropriately and how to age gracefully, this guide is the new essential read for men of all ages.
