The second edition of this unique text offers prospective counselors the tools and strategies they will need for working with general and special populations, including assessment tools, strategies for outpatient and inpatient treatment, information about maintenance and relapse prevention, and counseling strategies for couples, families, children, adolescents, college students, and recovering addicts. Each year, more than 33 million Americans receive health care for mental or substance-use conditions, or both. Together, mental and substance-use illnesses are the leading cause of death and disability for women, the highest for men ages 15-44, and the second highest for all men. Effective treatments exist, but services are frequently fragmented and, as with general health care, there are barriers that prevent many from receiving these treatments as designed or at all. The consequences of this are seriousâ€"for these individuals and their families; their employers and the workforce; for the nationâ€™s economy; as well as the education, welfare, and justice systems. Improving the Quality of Health Care for Mental and Substance-Use Conditions examines the distinctive characteristics of health care for mental and substance-use conditions, including payment, benefit coverage, and regulatory issues, as well as health care organization and delivery issues. This new volume in the Quality Chasm series puts forth an agenda for improving the quality of this care based on this analysis. Patients and their families, primary health care providers, specialty mental health and substance-use treatment providers, health care organizations, health plans, purchasers of group health care, and all involved in health care for mental and substanceâ€"use conditions will benefit from this guide to achieving better care.

It is a story of addiction treatment institutions from the inebriate asylums and Keeley Institutes to Hazelden and Parkside. It is the story of evolving treatment interventions that range from water cures and mandatory sterilization to aversion therapies and methadone maintenance. William White has provided a sweeping and engaging history of one of America's most enduring problems and the profession that was birthed to respond to it" -- BACK COVER.

Should a therapist ever shake hands with a client, or touch a client's hand or shoulder? There are taboos against erotic touch in psychotherapy, for excellent reasons, but what about nonerotic touch? These latter forms of physical contact are not explicitly taboo and they can be powerful forms of communication. Research and clinical experience indicate that they can contribute to positive therapeutic change when used appropriately. What, then, is appropriate use?

SUBSTANCE ABUSE COUNSELING, Fifth Edition, is at the cutting edge of the addiction field, combining a focus on the most current empirical studies with a firm belief that clients must be treated with a collaborative and respectful approach. These core values lay the basis for individualized treatment planning, attention to the client's social environment, a multicultural perspective, and a recognition that client advocacy is part of the counselor's role. Authors Lewis, Dana, and Blevins believe strongly that clients differ not only in the specific behaviors and consequences associated with their drug use but also in culture, gender, social

environments, physical concerns, mental health, and a host of other variables. Using an integrated approach, the authors describe innovative methods for meeting clients' needs through personalized assessment, treatment planning, and behavior change strategies, showing students how to select the most effective treatment modalities for each client. Updated with new references, this edition features a stronger emphasis on motivational interviewing, expanded material on ethical considerations, coverage of cultural and diversity considerations in every chapter, and digital downloads of key forms that appear throughout the text.

Everyone thrives on love, comfort, and the safety of family, friends, and community. But if you are denied these basic comforts early in life, whether through a lack of physical affection or emotional bonding, you may develop intense fears of abandonment that can last well into adulthood—fears so powerful that they can actually cause you to push people away. If you suffer from fears of abandonment, you may have underlying feelings of anger, shame, fear, anxiety, depression, and grief. These emotions are intense and painful, and when they surface they can lead to a number of negative behaviors, such as jealousy, clinging, and emotional blackmail. In *Love Me, Don't Leave Me*, therapist Michelle Skeen combines acceptance and commitment therapy (ACT), schema therapy, and dialectical behavioral therapy (DBT) to help you identify the root of your fears. In this book you'll learn how schema coping behaviors—deeply entrenched and automatic behaviors rooted in childhood experiences and fears—can take over and cause you to inadvertently sabotage your relationships. By recognizing these coping behaviors and understanding their cause, you will not only gain powerful insights into your own mind, but also into the minds of those around you. If you are ready to break the self-fulfilling cycle of mistrust, clinginess, and heartbreak and start building lasting, trusting relationships, this book will be your guide.

Those in recovery learn to “rein in their brain,” ending compulsive behaviors while fostering a more thoughtful lifestyle that ensures long term emotional sobriety. Addiction—whether to mood-altering substances, gambling, sex, or food— stems in part from an over-reliance on the reward system of a primitive part of the brain that can push us to make poor choices based on an expectation of immediate gratification. Those of us in recovery often struggle with the compulsive thoughts and behaviors that are still programmed in our addictive brains well after the drinking and drugging has stopped. These often play out thoughtlessly in our interactions with others, damaging our relationships and growth as balanced human beings. *Rein in Your Brain*, by addiction expert Cynthia Moreno Tuohy, offers ten tools for breaking the cycle of impulsivity. These time-tested self-interventions include standing still in the moment, giving up control, not assuming the other person's intent, tolerating differences, accepting emotions without giving them free reign, and differentiating between immediate fear-driven reactions and measured thoughts. By incorporating these tools in your daily interactions, your relationships can move from those of conflict to mutual respect and understanding.

Lessons from the personal experience and reflections of a therapist. The difficulty and cost of training psychotherapists properly is well known. It is far easier to provide a series of classes while ignoring the more challenging personal components of training. Despite the fact that the therapist's self-insight, emotional maturity, and calm centeredness are critical for successful psychotherapy, rote knowledge and technical skills are the focus of most training programs. As a result, the therapist's personal growth is either marginalized or ignored. The Making of a Therapist counters this trend by offering graduate students and beginning therapists a personal account of this important inner journey. Cozolino provides a unique look inside the mind and heart of an experienced therapist. Readers will find an exciting and privileged window into the experience of the therapist who, like themselves, is just starting out. In addition, The Making of a Therapist contains the practical advice, common-sense wisdom, and self-disclosure that practicing professionals have found to be the most helpful during their own training. The first part of the book, 'Getting Through Your First Sessions,' takes readers through the often-perilous days and weeks of conducting initial sessions with real clients. Cozolino addresses such basic concerns as: Do I need to be completely healthy myself before I can help others? What do I do if someone comes to me with an issue or problem I can't handle? What should I do if I have trouble listening to my clients? What if a client scares me? The second section of the book, 'Getting to Know Your Clients,' delves into the routine of therapy and the subsequent stages in which you continue to work with clients and help them. In this context, Cozolino presents the notion of the 'good enough' therapist, one who can surrender to his or her own imperfections while still guiding the therapeutic relationship to a positive outcome. The final section, 'Getting to Know Yourself,' goes to the core of the therapist's relation to him- or herself, addressing such issues as: How to turn your weaknesses into strengths, and how to deal with the complicated issues of pathological caretaking, countertransference, and self-care. Both an excellent introduction to the field as well as a valuable refresher for the experienced clinician, The Making of a Therapist offers readers the tools and insight that make the journey of becoming a therapist a rich and rewarding experience.

Theory and Practice of Addiction Counseling by Pamela S. Lassiter and John R. Culbreth brings together contemporary theories of addiction and helps readers connect those theories to practice using a common multicultural case study. Theories covered include

motivational interviewing, moral theory, developmental theory, cognitive behavioral theories, attachment theory, and sociological theory. Each chapter focuses on a single theory, describing its basic tenets, philosophical underpinnings, key concepts, and strengths and weaknesses. Each chapter also shows how practitioners using the theory would respond to a common case study, giving readers the opportunity to compare how the different theoretical approaches are applied to client situations. A final chapter discusses approaches to relapse prevention.

This study guide contains much of the "need-to-know" information that both IC&RC/AODA and NAADAC use in the preparation of their written examinations and is valuable in preparing for any of the other national drug/alcohol credentialing exams.
